ULTRA SOLAR POOL HEATING

WHY SOLAR POOL HEATING?

AVERAGE MONTHLY TEMPERATURE

SWIM SEASON QLD

■ 14 Ultra Pool Heating ■ Air Temperature
■ Desired Pool Temp ■ No Solar Pool Heating

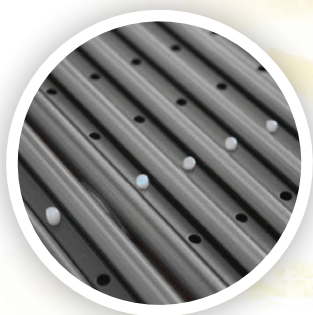

We're fortunate enough to live in Australia – one of the sunniest places on Earth. That means we have more opportunity than anyone to harness the sun's FREE energy to heat our pools.

Solar pool heating uses very little energy and has only a few moving parts. This makes it the most economical, renewable and low maintenance pool heating option available.

HOW DOES SOLAR WORK?

The cool water in your pool is pumped up to your roof, where the sun's thermal energy efficiently heats it through the collector mat, before returning it to your pool at a warmer temperature.

With the sun heating your water for FREE, solar can cost you as little as 18 cents an hour to run – all while being incredibly eco-friendly.

CHOOSE THE MOST ADVANCED SOLAR POOL HEATING ON THE MARKET

Simple to use and maintain, you can "set-and-forget" your Ultra solar unit to conveniently automate your pool heating.

AVAILABLE IN 10 OR 14 TUBE

Ultra solar systems are customisable to suit any roof profile. Choose the economical 10 Ultra or upgrade to the 14 Ultra for 40% more water flow through your solar collector. This reduces heat-up times by up to 20%!

DEVELOPED WITH THE LATEST TECHNOLOGY

Ultra solar pool heating systems use advanced conductive materials to enhance efficiency and heat your pool faster. The system includes heavy-duty manifolds, a boost pump and thermal solar collector to effectively automate your pool temperature.

MADE LOCALLY FOR AUSSIE HOMES

Ultra is designed, manufactured and quality tested for maximum UV resistance in tough conditions. With our incredible sunshine, it can extend your swim season to up to nine months of the year.
