WITH EXPERIENCE

**REDUCE EVAPORATION**  
BY UP TO 99%

**RETAIN HEAT**  
MINIMISE  
HEAT LOSS

**CUSTOM SIZING**  
TO ACCOMMODATE YOUR  
UNIQUE REQUIREMENTS

**VARIETY OF OPTIONS**  
TAILORED TO MEET YOUR  
SPECIFIC POOL NEEDS

**DURABLE**  
EXTENSIVE  
WARRANTY

# ULTRA POOL COVERS

## KEEP TURNING UP THE HEAT!

Spend more time in the pool with the whole family. Efficient pool heating and everyday swimming gives you more opportunities to create special memories with those you love.  
**Dive in, laugh and play... together.**

## WHY CHOOSE AN ULTRA POOL COVER?

The primary function of a pool cover is to retain chemically balanced water and heat; ultimately reducing evaporation and heat loss.

An uncovered pool can lose thousands of litres of water to evaporation annually. Covering a pool is the most effective method for reducing evaporation, which will also substantially reduce the amount of chemical replenishment required.

The addition of a cover is also an efficient method for adding and retaining heat in the pool. This will further reduce energy consumption, thereby contributing to sustainability efforts.
