KEEP TURNING UP THE HEAT!

Spend more time in the pool with the whole family. Efficient pool heating and everyday swimming gives you more opportunities to create special memories with those you love.
Dive in, laugh and play... together.

WHY CHOOSE AN ULTRA A FRAME ROLLER?

The Ultra A frame roller has been meticulously crafted for both durability and aesthetic appeal. It's streamline design not only enhances its visual appeal, but also ensures that it occupies minimal space. Manufactured from stainless steel or powder coated aluminium, the Ultra A frame roller is backed by a 10-year pro rata warranty and built to last.

A roller simplifies the use of a pool cover, making it effortless to roll on and off within minutes. The addition of the crank handle, compared to a traditional hand reel, makes removal of the pool cover much easier and more efficient. With a crank handle roller, there's no need for pulling, dragging, or folding. This process is quick, easy, and can be accomplished by just one person, streamlining the entire operation.

Each roller comes with a pool cover attachment kit and a protective overcover included at no additional cost.
